Nour El Houda Bouajila

+1 (418)570-2244 — nourhb58@gmail.com — linkedin.com/in/nour-el-houda-bouajila — www.nour-el-houda-bouajila.rf.gd/

Summary — Full-Stack Developer with 3+ years of experience building and deploying scalable web applications using React, Node.js, and modern cloud technologies. Skilled in designing REST APIs, optimizing performance, and managing deployments with AWS and Docker. Strong focus on delivering reliable, production-ready solutions using CI/CD and clean architecture.

Skills

- **Programming Languages:** Python, JavaScript, HTML, CSS, PHP, SQL, TypeScript, PLSQL, Bash
- **Frameworks & Tools:** ReactJS, NodeJS, PowerBI, MySQL, NetBeans, Visual Studio, Anaconda, Terraform, Jenkins
- **Cloud & Virtualization:** AWS, Azure, Docker, Kubernetes, VMware, OpenStack, Proxmox, CloudFormation, EC2, S3, IAM, RDS, VPC, Load Balancer, Elastic Beanstalk
- **DevOps & Automation:** CI/CD, Infrastructure as Code, Cloud Automation, Container Orchestration, REST API, Cloud Migration
- **Project Management:** Agile Methodology, Web Analytics, Growth Strategies

Experience

Digital Men **January 2025 - July 2026**
Full-stack Developer *Tunis, Tunisia*

- Built and maintained full-stack web applications using React, Node.js, and Nextjs
- Deployed applications using AWS and Docker, ensuring scalability and reliability
- Collaborated with cross-functional teams to deliver responsive user interfaces

GrowthLab **March 2024 - December 2024**
Full Stack Developer *Tunis, Tunisia*

- Developed and deployed web applications using MERN stack
- Integrated CMS platforms and optimized website performance
- Provided technical support and improved client systems

Freelance Web Developer **Oct 2023 - Present**
Remote

- Delivered full-stack web applications using MERN and Nextjs
- Built and customized CMS solutions (WordPress, Shopify)
- Worked with international clients in English, French, and Arabic

Windeco **August 2022 - September 2023**
Information Technology Assistant *Tunisia*

- Developed internal web platform using React, Node.js, and MongoDB
- Built APIs and integrated frontend with backend systems
- Improved internal data management and system usability

FCAP (First Choice Auto Parts) - Internship **February 2022 - June 2022**
Business Intelligence Developer *London, England, United Kingdom*

Key Results

- Developed, designed, tested, and debugged applications to full production, avoiding 30% wasted time.
- Enhanced applications and improved performance through testing and validations against requirements and performance standards.
- Created SAAS to solve difficulties in HR and accounting departments, leading to a 40% increase in productivity.

La Poste Tunisienne - Internship **June 2021 - August 2021**
Customer Service Agent *Ksour el seff - hached, Tunisia*

Key Tasks

- Updated records with all interactions and customer transactions.
- Contributed to billing accuracy by determining charges for services requested, reducing customer complaints by 30%.

Lingare Mahdia - Internship **August 2020 - October 2020**
Graphic Editor *Mahdia, Tunisia*

Key Outcomes

- Implemented search engine optimization and content development, increasing social media follow-ups and clicks by 1060%.

– Created logos, business cards, ads, and posts with on-trend content to increase sales by 65%.

Tunisie Télécom - Internship **August 2020 - August 2020**
Customer Service Agent *Mahdia, Tunisia*
Key Observations
– Helped improve processes and products by relaying customer feedback.
– Listened to customer requests and specifications and made suggestions to appropriately fulfill needs.

Projects

DevSecOps PaaS Platform – Kubernetes Cloud
– Developed a cloud-native PaaS platform with Next.js, Docker, Kubernetes, Jenkins, and Argo CD, automating application builds, security validation, container image signing, and GitOps-based deployments.

Cloud-Native Food Delivery Platform (DevSecOps)
– Built containerized microservices architecture using Docker with CI/CD automation and Integrated DevSecOps practices to ensure secure and reliable deployments

TaskMaster – Scalable Task Management System
– Engineered full-stack system (React, Node.js, MongoDB) supporting scalable task operations and user workflows

Multi-Cloud Infrastructure Orchestration
– Automated cloud infrastructure provisioning using AWS and IAAS with scalable deployment pipelines across multiple cloud environments

Real-Time Communication System (WebRTC)
– Developed low-latency peer-to-peer video communication system
– Handled real-time signaling and data streaming architecture

Full-Stack E-Commerce Platform
– Built end-to-end e-commerce system with product management and API integration and optimized user interaction flows

Healthcare Data Management System
– Developed web-based system for managing and visualizing healthcare data
– Structured backend logic and data handling for efficient operations

AWS-Deployed Next.js Application
– Built and deployed cloud-native application using Next.js and AWS services
– Optimized performance and scalability through cloud integration

Education

iTeam University
Engineer's Degree, Cloud Computing & Virtualization *2023 - 2026*

Institut Supérieur de Gestion de Sousse
Bachelor's in Business Intelligence & Data Analytics *2020 - 2022*

Certifications
– MERN Stack Development Training (50H) - June 2023
– JavaScript Algorithms & Data Structures - February 2023
– Responsive Web Design - February 2023
– MOOC: English for Career Development - March 2023
– Bootcamp: Breast Cancer Prediction with SVM - January 2023

Community Involvement

Microsoft Club
– Served as General Secretary for 3 years.

ILA Club & Academia Club
– Active member and speaker.

Languages

– Arabic: Native
– French: Advanced
– English: Professional
